

Mobile SLAM COLOR 3D Laser Scanner

T8- Multi-Carrier · World-Realistic Color · Precision Level (mm)

T8 is an instrument which is wearable and vehicle-on. It can be used in various fields, such as cultural relics protection, real 3D, topographic mapping, water conservancy surveys, completion surveys, traffic surveys, mine surveys, facade surveys, underground space mapping, power inspections, and forestry surveys, etc.

60km/h Highspeed Scanning

Wearable/Vehicle-on Multi-Carrier

2mm Accuracy

Point Cloud Quality of Stationary Scanner

Auto-Modeling 3D Real Scene Mesh Models

PARAMETER

Relative Accuracy ¹	2mm (Dynamic/Static Scanning)		Movable Objects Removal	$\sqrt{}$
Absolute Accuracy ²	Horizontal 1.8cm, Vertical 2.5cm		CORS System	$\sqrt{}$
5A Criteria of Surveying a	and Mapping³	$\sqrt{}$	LIO-PANO ⁶	$\sqrt{}$
Repeatability Accuracy ⁴		2cm	RTK-SLAM ⁷	$\sqrt{}$
Horizontal/Vertical Accur	acy Error	0.005°	PPK-SLAM ⁸	$\sqrt{}$
Point Cloud Density⁵		500,000 pts/m ²	LiRF9	$\sqrt{}$
Point Cloud Thickness		2mm	3D Real Scene Mesh Models	$\sqrt{}$
Imager Sensor	1i	nch SONY CMOS*4	3D Thermal Map of Point Cloud Accuracy	$\sqrt{}$
Camera Field of View		360°	Accuracy Report	$\sqrt{}$
Lens		Leica F2.2*4	GCP Inserting Instruction	

MODEL	T8-32	T8-300
Laser Channels	32x3	32x3
Measure Range	120m	300m
Points per Second	1,920,000	1,920,000

- 1/2/4. Scenes with weak quantity and quality can impact Repeatability Accuracy, Relative Accuracy, and Absolute Accuracy, it's better to acquire the accurate point cloud results according to the working methods which are recommended by the manufacturer.
- 3. 5A Criteria of Surveying and Mapping: In the geogspatial information, anyone, at any time, using any device, following any route, and scanning any scene, can obtain the unique result of point clouds.
- 5. Point Cloud Density: Products can approach to the maximum density of point clouds.
- 6. LIO-PANO: Online colorization technology with multi-model fusion of lidar and panoramic camera.
- 7. RTK-SLAM: Tightly coupled complementary filtering algorithm of Real-Time Kinematic.
- 8. PPK-SLAM: Tightly coupled complementary filtering algorithm of Post-Processed Kinematic.
- 9. LiRF: Lidar Radiance Fields.
